PROGRAMME OF STUDY - TERM 1

THEME 3: ECONOMIC DEVELOPMENT

- Identify and explain development indicators and inequalities between and within countries.
- Describe and explain the process of globalisation and consider its impacts.
- Describe and explain the main features of an agricultural system: inputs, processes, and outputs.
- Recognize the causes and effects of food shortages and describe possible solutions to this problem.
- Demonstrate an understanding of an industrial system: inputs, processes, and outputs.
- Describe and explain the factors influencing the distribution and location of factories and industrial zones.
- Evaluate the benefits and disadvantages of tourism to receiving areas.
- Describe and explain various sustainable methods to manage tourism.
- Describe importance of non-renewable fossil fuels and renewable energy in countries with different development levels.
- Evaluate the advantages and disadvantages fossil fuel, nuclear power and renewable energy.
- Describe methods of water supply and the proportions of water used in countries at different levels of economic development.
- Explain why there are water shortages and describe water management methods for future supplies.
- Describe how economic activities may pose threats to the natural environment, locally and globally and the need for sustainable management.
