

YEAR 7

GEOGRAPHY

SRI KDU
International
School
SUBANG JAYA

PROGRAMME OF STUDY - TERM 1

IT'S YOUR PLANET!

- Explain how Earth was formed and estimate the timeline of its formation.
- Identify the approximate time period when humans first appeared on Earth.
- Determine the approximate period when humans first arrived in the region now known as the UK.
- Understand and accurately define key terms related to Earth's history, including evolution, mass extinction, geological timescale, eon, and fossil.
- Identify the time frame of the Precambrian eon and describe the types of life forms that existed during this period.

MAPS AND MAPPING

- Explain the various ways in which individuals are connected to people and places around the world.
- Define and describe mental maps and their significance in geography.
- Understand what the scale on a map represents and how to use it to determine distances.
- Differentiate between a sketch map and a detailed map found in an atlas.
- Identify compass points and explain their importance and applications in navigation.
- Understand and accurately define relevant geographical terms.

ABOUT THE UK

- List and locate the countries and nations that make up the British Isles.
- Identify and describe the regions in the UK that are the warmest, coldest, wettest, and driest.
- Understand and accurately define the terms urban area, rural area, and population density.
