## PROGRAMME OF STUDY - TERM 1

### FROM ROCK TO SOIL

- State examples of different rocks and minerals.
- Explain factors that affect the rate of weathering and describe the rock cycle.
- Explain that plate movements brought this land to its present position.
- Justify the use of various landscapes according to soil type.
- Analyse how soil builds our body.

### LIVING OFF EARTH'S RESOURCES

- Explain physical and economic water scarcity and its contributing factors.
- Identify countries with physical and economic water scarcity.
- Know what and where the Ogalla is and how it's an important water source.
- Analyse the growing water challenge.
- Apply the value of soil on desertification.
- Identify ways to fight desertification.
- Understand that oil is a key resource, unequally distributed and that our dependency on oil causes problems.
- Analyse the different available natural renewable energy source.
- Create ways on how to replace oil with solar power.
- Evaluate the impact of exploiting natural resources on other species.
